

Exothermic Welding Mould Handle Clamp (NHC)

Application:

When the termic reaction happened, the mould and connected subject are so hot. So Exothermic Welding Mould Handle Clamp is required to hold the graphite mould and conductors in place whilst the connection is being made.

Structure Outline:

Specification:

Three sizes of Handle Clamp cover the range of connections shown in this catalogue.

Ord. Code	Description	Dimention (mm)	Box. Qty	Weight (Kg)
NHC-50	Small Moulds	95*65*250	1	0.85
NHC-80	Medium Moulds	95*85*250	1	1.09
NHC-100	Large Moulds	95*103*290	1	1.14

Handle clamps also available to be used in molds for cables (or tapes) on earth rods, corrugated rods or metallic through hole surfaces in vertical and horizontal form.
